- GFSI Ed.7 Application
- Validity IFA v4
- Existing IFA v4 certificates still valid
- GFSI Ed.6 Benchmark
- GFSI Ed.7 Benchmark
- GFSI Ed.7 Benchmark
46% of food illness is thought to be caused by Fruit and vegetables
(University of Georgia, 2013)

- 2006 Spinach contamination from E.coli 0157 > 4 dead
- 2008 Honduras melon ban into USA due to suspected Salmonella
- 2011 Bean-sprouts with E.coli in Germany > 54 dead
- 2011 Melon Listeria in USA > 33 dead

Food safety has always been a key platform of the GLOBALG.A.P. standard, and GLOBALG.A.P. has undoubtedly made a major contribution towards maintaining consumer safety since its inception in 1996.

We must continue to provide a safe framework within which to grow food, as well as protection in the event of an incident.
REVISION PROPOSAL: FOOD SAFETY AND MICROBIAL RISKS: PROCESS

- Changes are proposed by industry Stakeholder Committee
- We are using latest science based food safety knowledge
- Changes will only impact on areas known to bring risk
- All changes will go through a process of public consultation
- Timescale: aim to include new standards in V5 in 2015
