

# Other Programs in the GLOBALG.A.P. Database

## Data Access Rules

Version 1.0

This document sets out the rules according to which different user groups of the GLOBALG.A.P. Database have access to data about other programs a producer is participating in. The producer has given his consent that this additional information is registered in the GLOBALG.A.P. Database by their Certification Body /Trustee and that it is visible to the following Database user groups. The “X” states that the data is visible to users assigned to the respective data access group.

A list of all market participants is published on the GLOBALG.A.P. website.

### 1. GENERAL VISIBILITY OF THE OTHER PROGRAMS IN THE GLOBALG.A.P. DATABASE

The other programs are **not** visible to the public.

### 1. PRODUCER DATA

The information listed below is linked to the following legal entities that are registered in the GLOBALG.A.P. Database:

- Option 1 Individual Producer
- Option 1 Multi-site Producer
- Option 2 Producer Group (legal entity)
- Option 2 Producer Group Members (legal entities)

#### Important:

- To grant access to the information about other programs in the GLOBALG.A.P. Database, GLOBALG.A.P. has created a new data access group: the so-called “Other Programs Observer”. This data access group is automatically granted to all users in the data access group “Market Participants” – in short: all market participants will have access to this feature.
- The data access rules listed below only apply for information that is registered in the GLOBALG.A.P. Database. If a producer also allows the certification body to upload an audit report or a checklist, all market participants will automatically have access to all data that is filled in the checklist.

<sup>1)</sup>For every legal entity with a program with an active status, data access of the company and PHU / SITE name, country and address is granted to market participants. This applies for Option 1/3 as well as for Option 2/4 producer groups only for standards mentioned in Chapter 2. Producer group members (Option 2/4) may optionally release the data to the different data access groups.
