RESponsible Farming and Traceability at Every Stage of the Supply Chain

Yearly audits verify every stage — including certification of the entire feed production process. The GLOBALG.A.P. Compound Feed Manufacturing standard, a requirement for IFA, covers social and environmental governance and mitigates feed safety and reputational risks.

EXTensive Offer to the Aquaculture Market

2.8 million metric tons are produced under GLOBALG.A.P. certified production processes annually, covering all species of:

- Finfish
- Crustaceans
- Molluscs
- Seaweed

Supported by a Unique Integrity Program

The first of its kind in food certification, the Integrity Program activities ensure the consistent delivery and implementation of our standards worldwide.
