OUR CORE VALUES

WE CELEBRATE DIVERSITY.

WE KEEP OUR PROMISES.

WE CHAMPION EXCELLENCE.

WE ARE DRIVEN BY SHARED VALUES.

WE ACT IN CONCERT.
Salling Group

Improving everyday life - for our customers, our colleagues, and in the societies we are part of
We are Denmark’s largest retailer with a strong portfolio of both brick & mortar and online formats.
Traceability, Transparency & Applicability

⇒ Core of Salling Group’s work with sustainable sourcing ⇒ We require full traceability and follow-up in a customized electronic platform
⇒ Striving for HARMONIZATION & UNIFORMITY ⇒ Pesticide use and residue monitoring
⇒ Reducing standard duplication ⇒ We do not wish to reinvent the wheel!

Ensuring food safety, and environmental compliance

We require GLOBALG.A.P. certification from all fresh produce vendors + producers of processed tomatoes
⇒ Interest in the SPRING add-on module as a result of increasing focus on and issues around water usage in the avocado industry and the agricultural industry in general

Salling Group social compliance requirements

⇒ Salling Group accepts the GRASP add-on module as equivalent to BSCI to ensure accessibility and feasibility of social audits for agricultural producers
⇒ Social audit is required from all producers in risk countries (amfori) + Spain, Portugal, Italy & Chile
⇒ GRASP is the chosen social audit format for >80% of Salling Group’s fresh produce suppliers

Joined GLOBALG.A.P. as members in spring 2019 and were elected to the GLOBALG.A.P. board in November 2019
The SPRING add-on is designed to assess sustainable water management criteria:

- Legal conformity of water sources
- Legal conformity of extraction rates
- Best practices in water management
- Protection of water sources
- Monitoring of water consumption
- Impact of producers on sustainable watershed management
Simplification:

• reduced audit burden

• enhanced access to diverse markets
