LAUNCH OF TR4 ADD-ON
“TR4 represents a global threat for the banana supply chain. The REWE Group is supporting the implementation of the GLOBALG.A.P. TR4 Bio-Security Add-on and is requesting the company’s suppliers and the global retail sector to promote strong and effective action against the spread of the pathogen.”

(October 2018)
“The TR4 standard as a standalone option will help farmers to protect their produce on a much larger scale – regardless of final market destination. The ultimate aim is to ensure preventative measures are implemented widely enough to prevent the mass spreading of TR4.”

DEVELOPMENT OF NEW STAND ALONE TR4 BIOSECURITY STANDARD FOR BANANAS

GLOBALG.A.P. solutions and the German Supply Chain Act

**Declaration of principles**

| 1. | Risk management | Further development of the standard regarding LkSG, integration of GRASP as minimum requirement |
| 2. | Risk analysis | Provision of data at operational level and overarching reports on significant risks |
| 3. | Preventive and mitigation measures | Implementation of a follow-up and mitigation process in case of deviations in the social standard |
| 4. | Complaints management | Creation of overarching, neutral and global complaints mechanisms for workers (NOT YET PART OF THE SOLUTIONS) |

5. Reporting

6. Declaration of principles

A roadmap is necessary to further develop and empower GLOBALG.A.P. farm assurance solutions in relation to the German Supply Chain Act requirements.
F-Trace, GLOBALG.A.P., GS1 AND IFS AGREE ON STRATEGIC ESG COOPERATION

The aim of the collaboration is to leverage holistic supply chain solutions and provide supply chain participants with valid data.
